SKILLS

Python

pandas, NumPy, SciPy, statsmodels, scikit-learn, XGBoost, TensorFlow/Keras, SHAP, matplotlib; Jupyter, Google Colab

Statistics & Modelling

Exploratory data analysis, cross-validation, classification metrics (AUC, F1, MCC), significance testing, explainable AI, data leakage checks

SQL & Data

SQL (PostgreSQL basics), data cleaning, joining data from several sources, data quality checks

Reporting

Charts and written reports for non-technical readers, project and budget reports, documentation

Tools

Git and GitHub, VS Code, Linux basics (Ubuntu), Microsoft 365

LANGUAGES

English C1, working language
German A2, improving
Bengali native
Hindi conversational

M.SC. KEY MODULES

Advanced Statistics
Big Data Technologies
Software Engineering for Data-Intensive Sciences
Model Engineering
Data Science for Industry 4.0
Cyber Security and Data Protection

PROFILE

Highly motivated data analyst with an M.Sc. in Data Science (IU, 2026) and a passion for turning data into clear answers. In my master's thesis I built an end-to-end Python analysis of clinical voice and image data. Eight years of engineering projects taught me to turn messy numbers into clear reports. Eager to keep learning and contribute to team success in a full-time data analyst role. Based in Berlin; available immediately, open to relocation.

DATA PROJECT

M.Sc. Thesis: Early Detection of Parkinson's Disease Using Multimodal AI and Explainable AI

2026

IU International University of Applied Sciences | Python

- Built a reproducible Python pipeline for two data types: 195 voice recordings (22 acoustic features) and hand-drawn spiral images, from cleaning to modelling to final figures.
- Found that 195 recordings came from only 32 people, so a random split put the same person in training and test data; measured the effect: random splitting inflated AUC by 0.21 on average.
- Compared eight voice models with participant-level cross-validation, chose by a fixed rule (XGBoost for voice, DenseNet121 for images) and combined both: AUC 0.927, against 0.760 for voice and 0.901 for images alone; the gain was not statistically significant (McNemar test).
- Explained model decisions with SHAP and reported results with 19 figures and 30 automated checks that tie every number in the text to the data.

PROFESSIONAL EXPERIENCE

IT Support Assistant (Freelance)

10/2024 – present

Console IT · Technova Technologies · Brilliant Techno Services Ltd. | Berlin

- Support enterprise clients on site and remotely: Vantage data center (BER 11), JPMorgan Chase, Adidas, JD.
- Work through problems step by step with users and engineers, and write a hand-over note after every job.

Electrical Project Engineer

09/2016 – 08/2024

Taufika Engineering Ltd. | Dhaka, Bangladesh

- Planned, budgeted and tracked electrical works on commercial, industrial and government buildings, keeping projects on time and on budget.
- Wrote progress reports and handover files for clients and management; worked daily with clients, contractors and site teams.

EDUCATION

M.Sc. Data Science

10/2024 – 10/2026

IU International University of Applied Sciences | Berlin

M.Sc. Computer Science & Engineering

01/2022 – 02/2024

Uttara University | Dhaka

B.Sc. Electrical & Electronics Engineering

2009 – 2015

United International University | Dhaka
